

Go to Market Faster with Insurance-in-a-Box

Insurance-in-a-box solutions address the challenges of time-consuming core system transformations or start-from-scratch greenfield implementations

The Vision

Out-of-the-box cloud solutions for the Duck Creek Platform - agile, ready to use, flexible:

- Customizable to suit business requirements, market regulations, and scale of operations
- Bundled offering - implementation, support, and managed services in the cloud
- Hosted on Microsoft Azure, powered by Duck Creek OnDemand - cloud-enabled, secure, and innovation-ready
- Powered by Mindtree accelerators - digital, data and analytics, testing, regional layers
- Full-suite support including auto-update of content and software upgrades

Requirements

This solution encompasses Duck Creek Policy, Billing, and Claims implementation, pre-configured content for certain lines of business, pre-built third-party integrations, upgrades and maintenance, infrastructure, cloud operations, governance, and support services. Mindtree will standardize all aspects of the solution for greater agility, efficient business operations, and cost benefits to its clients. Additionally, Mindtree aims to enhance the package with its digital, analytics, and AI-based accelerators and solutions for rich user experiences and smart decision-making capability.

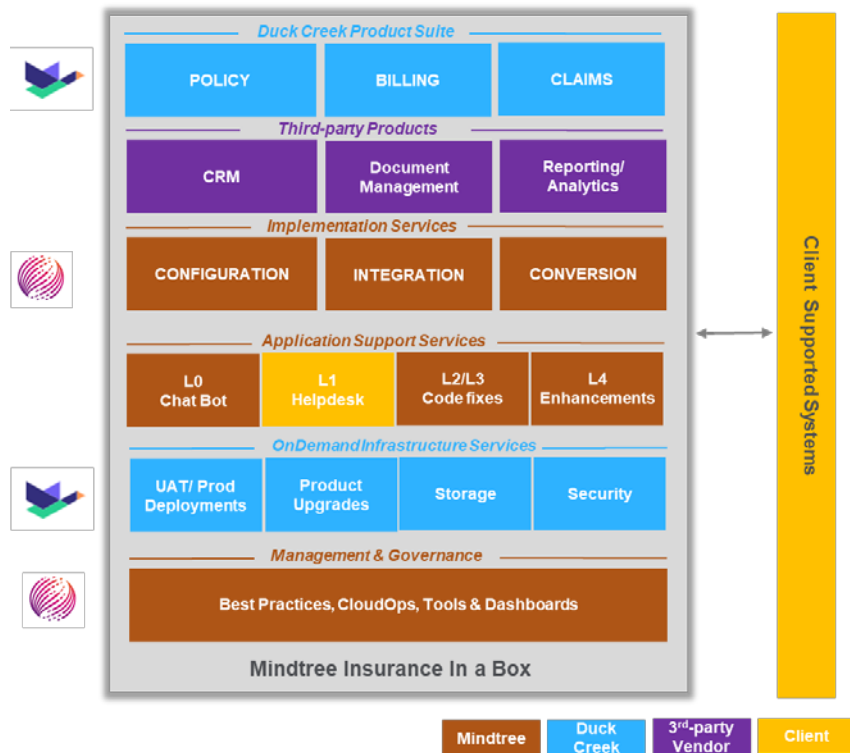

This solution also offers accelerated capabilities to meet local regulatory and carrier specific business requirements, and integrates with:

- MS Dynamics for channel management, lead management, producer onboarding, supplier management, and customer relationship management functions, as well as BPM and workflow and case management functions.
- Custom modules built on the Duck Creek Platform for customer portals and distribution / agent portals using the My Account Portal accelerator, as well as mobile apps
- Duck Creek tools for document generation
- Microsoft SharePoint for document management
- Duck Creek Insights for reporting and analytics, with additional accelerators from Mindtree for enhanced features and functions using MS Power BI
- Chatbots/Voicebots using Mindtree accelerators built on the Microsoft BOT framework
- Automation Anywhere/UI path for business process automation
- Mindtree accelerators to integrate with a number of third-party data and service providers for straight-through processing of policy underwriting, claims processing, and billing functions.

The Process

Implementation services include Mindtree delivering a pre-configured, out-of-the-box Duck Creek Policy, Billing, and Claims suite that is integrated with other software products and third-party data service providers in an agile approach. Standardized best practices are followed to allow consistency. Customizations, if any, are kept to a minimum to deliver at speed. Following the implementation phase, application support services are provided to keep business operations running without disruption and with maximum agility and efficiency. Mindtree application support services are seamlessly combined and delivered with Duck Creek OnDemand infrastructure services. Mindtree provides a whole suite of tools, best practices for proactive management, and governance for automation, smooth cloud operations, and continuous integration and delivery in a managed services model.

Mindtree also provides on-premises to cloud migration for Duck Creek and other insurance applications.

Outcomes

- Fast track to standing up new lines of business on Duck Creek solutions in the cloud for any size carrier
- An alternative to long and costly core systems transformation
- A comprehensive end-to-end solution for small to mid-sized carriers and MGAs with the Duck Creek Platform and an integrated ecosystem
- Single-vendor integrated approach for faster speed to market and cost-effective operations
- Ability to stay current through auto-updating of content and upgrades
